

TokenStars 2021 in Review

This year has been very eventful and multifaceted. Everyone has already got used to quarantine norms, and the world of sports has begun to return to its previous rhythm, but with a slight adjustment for the number of observations in the stands. The Olympic Games and the European Football Championship, which should be held in 2020, were postponed for a year due to the pandemic. In other sports, competitions were canceled or postponed as well, but on the other hand, brilliant victories and world records still happened.

We are summing up the results of this sports year within TokenStars and briefly reporting all our achievements:

- **3 new players joined the poker stream**
- **17 fan activities were held on the platform**
- **Tokens are listed on 2 new DEXes**
