Minimizing risks with REGA

Protection of our token holders was always our key priority and in 1Q 2019 TokenStars signed a partnership agreement with REGA - the world's first crowdsurance platform on blockchain.

- ✓ Partnership agreement with a risk-sharing platform on a blockchain is signed.
- ✓ TokenStars together with REGA will create a crowdsurance solution for athletes.
- ✓ This partnership allows TokenStars to minimize potential risks while funding the junior sportsmen.

[REGA](#) develops a risk-sharing platform on blockchain where participants could unite in groups to protect each other. Crowdsurance, an alternative to traditional insurance, introduces a number of options for athletes wishing to protect themselves without involving insurance companies as well as for investors who fund the careers of young sportsmen.

Together we plan to create **bespoke crowdsurance solutions for the sports industry** and to introduce the scoring system for applications from junior athletes on the TokenStars platform.
